GIRLS INTO GEOSCIENCE

6 – 7 JULY 2020

“Girls into Geoscience is becoming more than just an event. It has become a network, supporting women in geology and those aspiring to be. Get involved!”

This exciting two day event, with optional field trip to see the fantastic local geology, will introduce female A level students to the Earth Sciences and demonstrate the world of careers open to Earth science graduates today.

With seminars from women working in Geology and hands on workshops on a range of geological topics, this year’s Girls into Geoscience event isn’t one to miss.
